

# CRYO-GEL™ / 0°C GEL PACKS

Available in multiple sizes and weights, Cryopak's gel packs are a convenient way of keeping your temperature sensitive shipments within the desired temperature range.

- **Non-toxic**
- **Reusable**
- **4 mil LLDPE film for robustness**

The water gel packs (also called eutectic gels) are flexible gel packs and can be re-used few times. They last longer than traditional ice. The phase point of the Gel Packs is 0°C. Our water gel packs are designed to protect the products against the frost or overheating and guarantee transport security of food, pharmaceutical, and other medical products. □

The Gel Packs are available in the standard shape of ice packs in long-lasting plastic. Our eutectic gels can be personalized with your logo or your inscriptions on it to facilitate communication with your users. □

Our Gel Packs comply with FDA 176.170 food regulation, non-toxic, non-dangerous and are biodegradable. These gel packs are used in the thermal transport systems of Cryopak for useful thermal sensitive charges such as pharmaceutical products

| Item Number      | Description                  | Unit Dimensions | Unit Weight | Units Per Case |
|------------------|------------------------------|-----------------|-------------|----------------|
